

# JOINT CONGRESS – Marseille

Detail of the June 1<sup>st</sup> conferences

## The Revival of Nuclear industry!

Geopolitical tensions and electrification of our production modes modified the perception of nuclear production in Europe.

**EDF Top management** will present the EPR2 plans and strategies to achieve the ambitious challenges of energy sovereignty and decarbonized electricity production.

The challenges of maintenance, Innovation and Human resources they are faced with will only be possible if we recreate collaboration in the value chain (that will include valves, taps, pumps and compressors) .

**Laurent Arnold** - EPR2 Procurement & Supply Chain Chief Officer

**Antoine Vassalo** - Directeur de la Division de l'Ingénierie du Parc et De l'Environnement

**Denis Ferrand** - executive general Manager Rexecode

Between China and the US, what about European industry ?  
**reindustrialisation, green industry, high intensity regulation**  
... → **prospective scenarios**

**JUNE 1ST IS DEDICATED TO  
A HIGH LEVEL PROSPECTIVE  
CONFERENCES SET**

- ✓ Hydrogen : Opportunities in the Hydrogen value chain
- ✓ Water : The development of new water economy
- ✓ Nuclear is once again becoming an option for electricity production
- ✓ Reindustrialisation : prospective scenarios

**Every drop count: from abundance to self sufficiency!**

Because of the global problem of access to water will increase due to the climate change, the new economy of water is under development. Managing this fundamental resource in an holistic mode is the key for the next decades.

**Veolia or Suez (global leaders in the water management) and Xylem** will present their vision on the water resource management for the next decades and how we can develop the self-sufficiency of industrial sites and area using intelligent and real-time monitoring of data, collection, and use of rainwater the reuse of greywater and wastewater for uses not related to drinking water

**Hydrogen technologies for climate neutrality!**

Hydrogen is one of the solutions to decarbonize our production mode.

The hydrogen value chain

**Top managements from Air Liquide** will present the projects they are leading for the first one on the large-scale electrolyzers in Europe. Moreover, they will present their strategy to develop the hydrogen value chain all around Europe.

**JUNE 1ST IS DEDICATED TO A HIGH LEVEL PROSPECTIVE CONFERENCES SET**

- ✓ Hydrogen : Opportunities in the Hydrogen value chain
- ✓ Water : The development of new water economy
- ✓ Nuclear is once again becoming an option for electricity production
- ✓ Reindustrialisation : prospective scenarios
